

# Postdoc position

## Investigation of Phototrophic Bacteria

**Laboratory of Anoxygenic Phototrophs** is looking for a chemist, biochemist or microbiologist to participate in the *PhotoGemm+* project funded by the Czech Grant Agency in the *EXPRO* program. The project focuses on the analysis of pigments (carotenoids, bacteriochlorophylls) in novel phototrophic organism belonging to the rare phylum *Gemmatimonadetes* (see our recent publications: Zeng et al. PNAS 111:7795-7800, 2014; Dachev et al. Plos Biol. 15: e2003943, 2017).

## Postdoc available

The Laboratory of Anoxygenic Phototrophs at the Institute of Microbiology in Trebon, Czech Rep., is looking for a motivated candidate with a PhD degree in microbiology, biochemistry, molecular biology or similar fields.

**Project:** Light energy from the sun drives almost all life on Earth. Photosynthesis, the process where light energy is captured and converted into the chemical energy used by organisms, represents one of the most fundamental biological processes. The available project focuses on the recently discovered phototrophic organism belonging to rare bacterial phylum *Gemmatimonadetes* (Zeng et al. PNAS 111:7795-7800, 2014; Dachev et al. Plos Biol. 15: e2003943, 2017; Mujakić et al. mSystems 6, e01241-20, 2021).

## Team

We are an international, competitive group working on physiology, genomics and ecology of anoxygenic phototrophic bacteria. The communication language is English. The team collaborates with laboratories in Europe, USA and Japan. The Institute of Microbiology is a part of the Czech Academy of Sciences and represents one of the top research institutes in the Czech Republic. This spring, our team volunteered with COVID-19 testing for the local hospital. Trebon is located in the center of lake-land nature reserve area.

## Recruitment procedure

A motivation letter and CV should be sent to [aap@alga.cz](mailto:aap@alga.cz). The selected candidates will be contacted for additional information. The interviews will be held in June-July. The position is open until filled.
