

Applied and contract research in algal biotechnology

Richard Lhotský

Laboratory of Applications, Centre Algatech, Institute of Microbiology CAS, TŘEBOŇ

Centre ALGATECH is a Center for **algal biotechnology**. What algal biotechnology do we offer? Is there a market for our applied research? Should be research involved in commerce? What is current situation in Europe in algal biotechnology? How many companies are involved in the business? What does commercialization mean? What are the procedures? Many questions for a short seminar, but I try to answer all of them.
