

**Biosynthesis of natural products derived from fatty acid metabolism in cyanobacteria:
chlorosphaerolactylates, nocuolin A and nocuolactylates.**

Dr. Pedro Leao

Invited speaker of the Laboratory of Biotechnology

Pedro Leão graduated in Biochemistry from the University of Porto in 2005 where he also received his MSc and PhD. He spent his research stays at Scripps Institution of Oceanography and Harvard University. He became PI at CIIMAR (Interdisciplinary Centre of Marine and Environmental Research) in 2015. Pedro's research focuses on the chemistry, biosynthesis and ecology of cyanobacterial natural products.
