

## **Laboratory technician / research assistant position**

We are looking for a laboratory technician / research assistant for a 60% full-time equivalent position at the Centre Algatech, Třeboň. The position is supported by a five-year grant to Jan Janoušek in the Laboratory of Photosynthesis.

The successful candidate will be responsible for organizing laboratory space, ordering, and helping with ongoing research projects. S/he will have a biology background and hands-on experience in the field of molecular biology. Applicants with good organization and communication skills, knowledge of English, and with experience in genetic transformation and cloning will be preferred. The position is opened for three months at the first instance with a possibility of extension and full-time contract negotiation upon satisfactory performance. The salary will be based upon qualification and experience, in the approximate range of 26-28 thousand CZK per FTE.

A professional CV with a covering letter should be sent directly to **janouskovec@alga.cz**.

The position is open until filled with interviews taking place on a rolling basis. The preferred start is in April 2021.
